# Problem Statement”

Public infrastructure issues like potholes and broken amenities harm safety and quality of life, with no efficient system for reporting or resolving them promptly.

## 5000 Deaths Annually

Approximately 3,500 to 5,000 people die annually in India due to accidents caused by potholes

## 25%

of urban commuters face daily challenges due to faulty infrastructure like broken benches, malfunctioning traffic lights, and unmaintained bus stops

# Solution

A mobile app that allows citizens to report faulty public infrastructure, bringing issues like potholes and broken amenities directly to authorities' attention for improved awareness and potential resolution.

## Key benefits include:

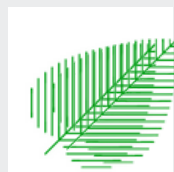

Quick  
Resolution

Empowered  
Citizens

Streamlined  
Communication

# FixItNow

## HOW IT WORKS?

Citizens can take a photo of an issue and pin it on a map using the Google Maps API. Other community members can upvote or downvote the issue if they've faced it too. These reports are then forwarded to the relevant officials for action.

## Our Vision

# How we are doing it?
